

Rachana Varade

Software Developer

✉ rachanavarade1412@gmail.com ☎ +91 9637318046 📍 Pune, Maharashtra

SUMMARY

Motivated and detail-oriented Software Developer with 2+ years of hands-on experience in web application development using Python, JavaScript, and Frappe Framework. Proven ability to design, develop, and deploy solutions. Strong debugging and problem-solving skills with a commitment to writing clean, maintainable code. Enthusiastic team player and fast learner, ready to contribute to impactful tech solutions.

EXPERIENCE

Agkiya Technologies and Consulting LLP, Pune,

12/2023 – 01/2026 | Pune

Software Developer

- Technical Responsibility
- Developed and customized ERPNext modules to meet business needs.
- Worked directly with Functional Consultant and team to gather functional requirements
- Created dynamic print formats using Jinja2, HTML, and CSS.
- Built automations using server scripts, client scripts, third party API's integration and workflow, notifications rules.
- Wrote Python and JavaScript code to streamline processes and improve system usability.
- Designed dashboards and custom reports for real-time insights.
- Ensured smooth data integration across doctypes and modules.
- Performed debugging, testing, and deployment support.
- Technology Used

Python, JavaScript, Frappe Framework / ERPNext, Jinja2, HTML, CSS, Vue.js (basic UI enhancements), REST APIs, SQL Queries,

• Projects

1. ERPNext Module Customization (HR, Sales, Manufacturing)
 - Customized forms, workflows, validation logic, and server-side automation.
 - Improved user experience with client scripts and optimized data flow between linked doctypes.
2. Dynamic Print Format Development
 - Created advanced print formats for invoices, appointment letters, salary slips, export documents, and packing lists.
 - Added conditional logic, child-table data mapping, tax handling, multi-page layout, and company-wise formatting.
3. Export Invoice System
 - Developed a multi-page invoice system with logic for GST (IGST/CGST/SGST), item-wise tax split, and address formatting.
 - Improved readability with automated page breaks and dynamic sections.
4. HR Automation
 - Automated leave request checks, employee lifecycle validations, and salary/bonus calculations.
 - Created reusable letter templates with dynamic content and company-based styling.
5. Data Integration Across Doctypes
 - Implemented automatic item fetching from linked doctypes like Purchase Group Items.
 - Ensured clean, consistent flow of data across modules.

6. Dashboards & Reporting

- Built interactive dashboards using server-side scripts and JSON structures.
- Delivered real-time visibility for HR, Sales, and Manufacturing data.

EDUCATION

Institute of Management and Research, Jalgaon,

2020 – 2022 | Jalgaon

Masters Computer Application MCA

April 2022 CGPA: 7.7/10

Institute of Management and Research, Jalgaon,

2017 – 2020 | Jalgaon

Bachelors Computer Application BCA

May 2020 CGPA: 7.39/10

TECHNICAL SKILLS

Programming Languages & Frameworks — Python, JavaScript, HTML5, CSS3, Jinja2 Framework,

Frappe Framework, ERPNext, **Specialized Skills** — Asynchronous Programming with asyncio for scalable API Development (REST APIs, Postman) Database Management (MariaDB, MySQL),

Development Tools & Libraries — Version Control: Git, GitHub Package Management: pip Virtual

Environments, **Core Competencies** — Time Management, Team Collaboration, Problem Solving, Code Optimization

LANGUAGES

English

Hindi

Marathi
